a detailed analysis of the psychological and mechanical causes of the biggest rally and subsequent fall of housing prices ever recorded examines the causes of the breathtaking rise in prices and the catastrophic fall that ensued to answer the question on every homeowner's mind why did house prices fall page 4 of cover

abundant with practical advice and ready to use teaching examples this dynamic guide will help both new and experienced instructors of principles of microeconomics to reconsider and refine their courses mark maier and phil rudner assemble the wisdom of 25 eminent scholars of economic education on how best to introduce students to the discipline and inspire a long lasting passion for microeconomics

once in a while the world astonishes itself anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism modern political economics has a single aim to help readers make sense of how 2008 came about and what the post 2008 world has in store the book is divided into two parts the first part delves into every major economic theory from aristotle to the present with a determination to discover clues of what went wrong in 2008 the main finding is that all economic theory is inherently flawed any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality the only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science s tools e g calculus and statistics to second guess it the second part casts an attentive eye on the post war era on the breeding ground of the crash of 2008 it distinguishes between two major post war phases the global plan 1947 1971 and the global minotaur 1971 2008 this dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond modern political economics is essential reading for economics students and anyone seeking a better understanding of the 2008 economic crash

this book presents a fascinating story about how academia got it all wrong was it an academic conspiracy was it peculiar social pressures in academia regardless of how it all came about it is time to teach our children financial literacy instead of economics financial literacy is a course that prepares our children for success in today s economic society typical economics courses do nothing to prepare your child for understanding day to day economic responsibility this book presents the reasons to join the battle it is time to stand up and demand relevant education from your state education system

pika and maltese deliver comprehensive and engaging analysis of the increasingly political nature of the presidency while artfully balancing the historical foundations of the office this fully updated seventh edition includes analysis of the accelerated 2008 nomination process further scrutiny of the wars on

terror and in Iraq a close look at Bush's judicial appointments and a measured assessment of the president's impact on such pressing issues as education, global warming, and illegal immigration.

Principles of Economics 7th edition combines microeconomics and macroeconomics into one volume for students who take a full year's course. The latest edition of this text continues to focus on important concepts and analyses necessary for students in an introductory economics course. In keeping with the author's philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues such as climate change and resource taxation, the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, monetary and fiscal policy.

Our socio-economic innovation ecosystem is riddled with ever-increasing complexity as we are faced with more frequent and intense shocks such as COVID-19. Unfortunately, addressing complexity requires a different kind of economic governance. There is increasing pressure on economics to not only go beyond its traditional mainstream boundaries but also to tackle real-world problems such as fostering structural change, enhancing sustained growth, promoting inclusive development in the era of the digital economy, and boosting green growth while addressing the divide between the financial sector and the real economy. This book demonstrates how to apply complexity science to economics in an effective and instructive way in the interest of life-enhancing policies. The book revolves around the non-negligible problem of why economics to date seems to be inadequate in guiding economic governance to navigate through real and ever-intensifying complex socio-economic and environmental challenges. With its interdisciplinary approach, the book scans the nuanced nexus between complexity and economics by incorporating as well as transcending the state-of-the-art literature. It identifies ways to trigger opportunities for behavioural change in the economic profession with respect to how and what to teach, introducing and developing further complexity economics, taking into account the configuration of its main principles and outlining the silhouette of next-generation economic governance. The book deciphers recommendations for economic theory, practice, education, and economic governance. It will be of interest to students, scholars, academics, think-tank researchers, and economic policy practitioners at the national and/or supranational levels.

Who are the individuals whose novel ideas, writings, and philosophies have influenced economics throughout history and in doing so have helped change the world? This encyclopedia provides a readable study of economics by examining the great economists themselves. This book presents biographies of 200 economic thinkers throughout history, supplying a one-stop reference about the men and women whose ideas, writings, and philosophies created the
